

The Kodiak National Wildlife Refuge Conservation Film Series presents:

The Wolf Mountains

The European natural world could be even wilder than we might imagine. Large herds of bison and wild horses, huge bears and rivers teeming with salmon were once part of a wild Europe. As western civilization grew, this natural paradise disappeared centuries ago and it is hard to imagine how it might once have been.

There are now places in Europe where the wilderness of yesteryear returns. This film is a unique portrait of a pocket of European wild nature that has not been witnessed for generations.
